The Dewey Burdock example fits – thanks!
D

Bert, Darcy, and Sandy – I recommend we send the below. Thoughts?

- Dakota Access Pipeline, NEPA Comments to the ACOE EIS.
- Dewey Burdock Underground Injection Control (UIC) Program is proposing to issue three draft UIC Area Permits to Powertech (USA) Inc.
- State regional haze plan determinations, including Utah Regional Haze FIP (regional work/determination in coordination with HQ, signed by Administrator).
- Reviewing and rating Environmental Impact Statements for federal projects, examples include Enefit Energy Utility Right-of Way, Monument Butte Oil and Gas (Utah).
- Emergency Response for environmental releases that threaten water resources, e.g., Bridger/Yellowstone River pipeline spill.

Subject: quick turnaround question for transition

Hi all –

We are doing a “role of the regions” paper for the transition team – your DRAs have all seen and had opportunity to comment.

One of the things we are saying is that the regions are responsible to making some key programmatic decisions, in coordination from HQ, however managed out of the regions.

For example, some that come to mind from regions 1 and 2 are: GE Housatonic, Passaic, LIS Dredging.

Could each of you take a quick minute to send back at least one example of a key/major decision made in your region?

Thanks much
